

ABHYANKAR SHARMA

Software Engineer · MBA Candidate, Business Analytics & Finance

Boston, MA • abhisharma873@gmail.com • linkedin.com/in/abhyankarsharma • github.com/abhisharma873 • abhyankarsharma.com

SUMMARY

Software engineer with 4+ years building and delivering software for Fortune 500 clients, now completing an MBA in Business Analytics and Finance. Strong across the modern web stack (React, Node.js, TypeScript, SQL) with a founder track record: a B2B marketplace that placed 2nd at the Hult Prize, an AI SaaS tool built on the Anthropic API, and a live realtime web app. Combines hands-on engineering with business and financial judgment. F-1, OPT eligible July 2026.

EXPERIENCE

Software Engineer 2020 – 2024
Wipro Technologies Bengaluru, India

- Delivered software for Fortune 500 clients including PepsiCo, Morgan Stanley and Mylan as part of client-facing engineering teams.
- Owned technical delivery across the full development lifecycle, from build through testing and deployment, translating business requirements into maintainable software.

Full Stack Developer Full-stack program
Pesto Technologies Remote

- Built full stack applications across the JavaScript ecosystem with a focus on React and Node.js.
- Strengthened modern web fundamentals, API design and clean code through intensive project-based delivery.

VENTURES & PROJECTS

Helvra — Co-founder Hult Prize, 2nd place
Co-founded a B2B solar energy marketplace connecting commercial buyers and suppliers; placed 2nd at the Hult Prize at Hult Boston.

Hult Cup — Builder hultcup.com (live)
Built and deployed a realtime World Cup prediction platform with live scoring and leaderboards using React and Supabase.

ResumeTarget — Founder AI SaaS
Built an AI-powered resume optimization and ATS-matching tool on the Anthropic API.

KitaKapital — Builder Fintech demo
Built a Philippines-focused embedded lending platform demo with a credit-scoring model in React and TypeScript, deployed on Vercel.
